

COMPOSITE MANUFACTURING TECHNICIAN

Growing Aerospace and Defense Company has a need for a manufacturing technician with experience in composites to join our team. We design and build cool composite structures for aircraft, defense and space and would love you to join the team!

Duties:

- Mold and material preparation for lay-ups of composite structures
- Composite layup, tooling, using carbon fiber and other composite materials.
- Basic mechanical assembly and technical support of engineering and production
- Other duties as assigned

Requirements:

- 3+ years of composite layup experience in a deadline-driven environment
- Knowledge of materials, fabrics, resins, chemicals and components used in advanced composite production
- Must be US Citizen or resident legal alien (ITAR and DoD program requirements).

Work schedule is typically four 10 hour days, Mondays through Thursdays.

Interested candidates please send your resume to inquiries@adamworksinc.com or visit www.adamworksinc.com and submit an application.
